Appearance Protection Plus[™]

| CORROSION

DISCLAIMER: THIS BROCHURE IS NOT A CONTRACT. READ YOUR ACTUAL CONTRACT AGREEMENT AS ITS TERMS, CONDITIONS, EXCLUSIONS AND LIMITATIONS DICTATE YOUR COVERAGE.

V091117

Corrosion Protection

Appearance Protection Plus™ will provide multiple levels of protection to keep your vehicle free of rust and corrosion. The first level of protection is Corrosion Protection, which is a rust preventative that protects against corrosion perforation and surface corrosion. The second level of protection is Sound Shield, which protects the under body of your vehicle.

Corrosion Protection

Appearance Protection Plus™ uses a rust proofing compound that is a thixotropic blend of wax, rust preventative, and a sulphonate resin. This mixture is modified for maximum protection against rust.

Its unique physical structure allows for the penetration of the tiniest of cracks, allowing for protection in even the most hard to reach areas.

Appearance Protection Plus™ will not peel or crack. It is designed to withstand the coldest of winters and the hottest of summers.

By choosing Corrosion Protection, you are extending the life of the body of your vehicle. This will enable you to sell or trade in your vehicle at a higher value. One of the biggest determinations for resale is the condition of the body.

Appearance Protection Plus™ can also save you money from “excess wear and tear” when you turn in your leased vehicle.
